PLEXR

Plexr is a permanent non-surgical procedure used to lift and tighten eyelids and necks. It also effectively treats wrinkles, scars, moles and skin tags.

THREAD LIFT

A thread lift is an instant non-surgical facelift for the upper and lower face as well as the neck area (minimal recovery time). It also improves skin elasticity by depositing collagen for a youthful radiance.

PROFRACTIONAL

ProFractional Laser resurfacing dramatically remodels the dermis layer of the skin, the healing process stimulates collagen production and promotes skin tightening. The procedure treats fine lines, wrinkles, scars, pigmentation and refines pores.
